Autopilot outcomes: every change vs today's rules

Generated 2026-10-25. Nifty + Bank Nifty + Sensex. Full history 2023-01-02 to 2026-10-23; '2026' restarts the account on 1 Jan 2026. Starting capital Rs 2 lakh and Rs 20,000.

• Same engine as the Backtest tab's portfolio backtest (option prices modelled from the index, charges, slippage that grows with order size, freeze-size order splits, weekly loss limit, cash check).

• Each row changes only what its 'Changes' column says; everything else is today's Autopilot.

• '2026 only' restarts the account on 1 Jan 2026 - an unseen year for most rules (they were picked on 2023-25).

• Compounded totals follow ONE historical path: a few big wins or losses early change the size of every later trade, so neighbouring settings (e.g. risk 1.5% vs 2%) can differ by a lot. Read the worst fall and the 2026 column alongside the final value; the Rs 20,000 rows are the most path-sensitive.

• The AI judge (Nifty sizing) is not modelled; nor are real bid-ask spreads beyond the slippage model.

• A result that looks better on one window is not proof: most ideas here were already tested and rejected in research rounds 40-44.

How to read the verdict

Compared with the baseline row at the same capital and period. better = more profit and the worst fall no deeper (within 2 points); more profit, deeper fall = a trade-off; less profit, shallower fall = safer but earns less; worse = less profit and no safer; about the same = within 2% of the baseline's profit.

Today's Autopilot rules (the baseline)

What Autopilot trades	
Indices	Nifty, Bank Nifty, Sensex
Nifty	Noise band + Camarilla H4/L4 + Trend-day catcher + Fibonacci 0.618
Bank Nifty	Noise band + Camarilla H4/L4
Sensex	Noise band + Trend-day catcher + Fibonacci 0.618
Instrument	Buys an index option (CALL for up, PUT for down). Strike 1 step in the money; 1 step out of the money while equity is below ₹60,000
Never sells options	Only buys - the most you can lose on a trade is the premium paid; the stop normally exits well before that
Entry rules	
Noise band (Nifty, Bank Nifty, Sensex)	A 5-min close beyond open × (1 ± 1.75× the typical move-since-open at that time, last 14 sessions). Checked on the half hour 09:45-14:30 (:15 / :45). Signal valid 10 min. VIX 11-18
Camarilla H4/L4 (Nifty, Bank Nifty)	5-min close above yesterday's H4 (CALL) or below L4 (PUT), 09:20-13:00. VIX 11-20
Trend-day catcher (Nifty, Sensex)	Half-hour checks 10:45-14:15: close beyond the noise band AND VWAP, price on that side of VWAP for ≥80% of today's bars. Own slot. Only once equity ≥ ₹40,000. VIX ≥ 11
Fibonacci 0.618 (Nifty, Sensex)	5-min close crossing yesterday's pivot ± 0.618 × range, 09:20-13:00. Own slot. Only once equity ≥ ₹200,000
Slots	One Noise/Camarilla position per index; trend-day and Fibonacci each have their own slot
Stops, targets and exits	
Noise	Stop 2 × ATR(14, 5-min) on the index. Target 4R. Trails on the band / VWAP. No breakeven move
Camarilla	Stop at H3/L3, kept between 1 and 3 ATR. Stop to entry at +1R. Exit after 45 min if +0.5R not reached. No target
Trend-day	Stop = distance to VWAP + 0.5 ATR (1-3 ATR). Stop to entry at +1R. No target
Fibonacci	Stop at the 0.382 level (1-3 ATR). Stop to entry at +1R. 45-min time stop. No target
Square-off	Every open trade closes at 15:15. Nothing is held overnight
Partial booking	None - the whole position exits together (rounds 40-41: T1/T2/T3 booking earned less)
Days and conditions it sits out	

India VIX	No trades below 11. Noise needs VIX < 18; Camarilla ≤ 20
Union Budget day	No new trades
NSE holidays	Closed (list covers 2026)
Big 3-day run	ON: no CALL after a 3-session fall, no PUT after a 3-session rally, of ≥ 2× the daily ATR
Position size	
Risk per trade	1% of CURRENT equity (compounds as the account grows) ÷ the option's risk per lot
Confidence	ON: Nifty & Sensex risk 1.33× when 5-min/15-min/1-hour charts agree (score ≥ 5), 0.67× otherwise. Bank Nifty 1×. 'Strong' (2×/1×/0.5×) is opt-in in Settings
AI judge	ON: Nifty only, 1.33× / 0.67× on top of confidence (total 0.5×-1.6×). Not in the backtest
Drawdown brake	ON: half the risk while equity is more than 15% below its peak
1-lot floor	If 1% buys less than a lot, 1 lot is still taken while one lot risks ≤ 15% of equity; otherwise skipped
Cash check	Skipped if the account can't pay the premium
Big orders	Split into exchange freeze-size pieces (Nifty 3,510 qty, Bank Nifty 1,440, Sensex 1,000). The portfolio backtest also caps at 50 lots by default
Loss limits	
Weekly	No new trades for the rest of the week after −4% of equity (−15% below ₹100,000). Your choice in Settings can override
Daily	Two losers, −2% or 4 trades: advisory on the demo account unless 'Enforce daily limits' is on
Whose trades count	ON: only the system's own trades count toward the limits
Per-trade loss cap	None (round 44: a ₹2,200-per-lot cap cut profit; it is a backtest option only)

Starting capital Rs 2.00 L

Baseline: full history ends at Rs 32.60 L (worst fall -28.6%, 1921 trades); 2026 alone ends at Rs 4.57 L (worst fall -19.1%).
